## SUMMARY

I consider myself a Graphic Developer. What I program must work well and always look pretty!

I enjoy team collaboration as it is where minds are sharpened and great ideas arise. I dislike ignorance as an excuse for failure and arrogance as a barrier for understanding. That is why I am continuously learning and I am always willing to be taught and mentored.

It is a fact that hard work defeats talent, therefore I never settle for average and when I commit I am unstoppable.

## EXPERIENCE
